

FASCIA LOK

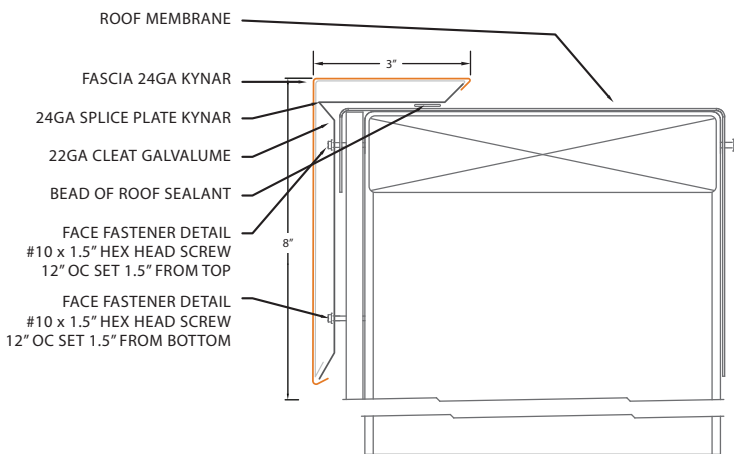

EDGE METAL

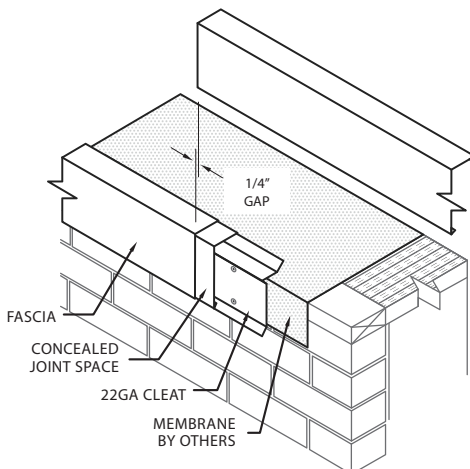

Waard Metals Fascia Lok two-piece snap-on fascia for single-ply applications. Waard Metals Fascia Lok provides superior protection against wind and water infiltration. Fascia Lok features 22ga continuous galvalume cleat with pre-punched fastener holes for easy install. Fascia Lok cover features Kynar coated metal in a variety of thickness and substrates. The 10' lengths offer maximum install efficiency and clean aesthetics. Also available are prefabricated inside and outside corners along with spillout scuppers and wall edge terminations. With five standard face dimensions, Fascia Lok offers solutions for most any roof edge.
